Frank and/or Julie;

I updated two items, Items #1 and #5, in the attached document to reflect the Renton specific language. The summaries are OK by us. Please replace your version of this document with the new language. Thank you. Julie said to send this to you Frank, since she might go home early today.

I've added the point segment stuff for you. I will review the language with Mike to see if he wants to change anything.

Thanks for your comments. Here is the revised document.

I edited the Summary box for the Pt/Seg discussion. Is that better?

Please fill in the Pt/Seg data for 737/757 Programs. Thanks.

Frank would like it if the text in Renton/Auburn boxes were yours. Please review again to see if you want to make any changes - including the list and the summaries. (I didn't mention back end, report generating tools, but didn't have much to say about it. Is there anything else to mention?)
